---

### SUMMARY

I am a **logical** and **analytical** thinker with nearly **1.11 years** of experience in **Software Testing**. As a detail-oriented software testing professional, I specialize in robust **quality assurance, unit and regression testing, and collaborative teamwork**. I have a proven track record of delivering **high-quality** results and am ready to contribute to dynamic projects with a commitment to excellence in software testing and engineering. Being an excellent team player with a **positive attitude**, I possess good **interpersonal** and **communication** skills. My **analytical skills** enable me to investigate and solve technical problems while proposing sound solutions. I have experience working with Agile, Iterative Model, and the Waterfall models of testing, and I have the ability to analyse and design **complex scenarios** in accordance with **IT/Business/testing requirements**. I like to **learn** new things every day, helping others to grow & taking help to grow.

### TECHNICAL SKILLS

**Technical Expertise:** Manual testing, automation testing, Java, C, C++, Python, HTML, CSS, Bootstrap.

**Tools:** Visual Studio, Selenium, Word press, Elementor.

### EXPERIENCE

**Capgemini – Senior Analyst: Testing (Manual & Automation)** [1.11 Years] May 2022 - present

- Conduct comprehensive testing of software applications, including functional, regression, integration, and user acceptance testing, to ensure functionality, usability, and reliability.
- Develop and execute test plans, test cases, and test scripts based on project requirements, collaborating closely with cross-functional teams to understand project objectives and mitigate risks.
- Utilize testing tools and frameworks such as Selenium, JUnit, TestNG, etc., to automate test cases and enhance testing efficiency, while providing timely and accurate reports on testing progress and defect metrics.
- Contribute to the continuous improvement of QA processes, methodologies, and best practices within the organization, staying updated on industry trends and advancements to enhance skills and knowledge.

### INTERNSHIP

**Imagispark – Web Designer**

**December 2021 – April 2022**

- Collaborated with clients and stakeholders to understand their design requirements and objectives, translating them into visually appealing and user-friendly website layouts.
- Implemented responsive design techniques to ensure optimal viewing experiences across various devices and screen sizes, and optimized website performance for speed and accessibility.
- Worked closely with developers to implement design solutions, providing guidance and support throughout the development process to ensure the final product met quality standards and client expectations.

### RECENT PROJECTS

- **NBCU Japan Universal**

#### **Roles & Responsibilities:**

1. Developed test cases within Jira for user stories.
2. Provided validation for user stories.
3. Logged bugs when necessary.
4. Executed application tests using both test cases and user stories.
5. Conducted thorough testing of identified bugs and updated their statuses accordingly.
6. Collaborated with the team to ensure comprehensive testing coverage.
7. Contributed to improving testing processes and methodologies.
8. Maintained clear and concise documentation of testing activities and results.

- **NBCU Quantum Ess**

**Roles & Responsibilities:**

1. Conducted functional, regression, and system testing using Quality Centre.
2. Generated test cases based on requirement documents.
3. Participated in test planning, execution, and defect management activities.
4. Ensured understanding of new business requirements and performed functional and regression testing to validate system functionality.
5. Collaborated with the team to ensure test effectiveness and coverage.
6. Provided feedback on system improvements based on testing outcomes.
7. Assisted in creating and maintaining test documentation and reports.

- **Warner Bros. Salesforce MAPS**

**Roles & Responsibilities:**

1. Identified and documented defects using Jira.
2. Utilized Quality Centre for functional, regression, and security testing.
3. Tracked and reported defects in both Quality Centre and Jira.
4. Analyzed new business requirements and conducted functional and regression testing to ensure system compliance.
5. Participated in test planning, execution, and defect management processes.
6. Distributed tasks, sent status emails, provided client reports, and managed deliverables.

**CERTIFICATION**

- Ocean Certification in Automation Testing Agile Methodology
- Training in Salesforce Administration
- Quality engineering and testing

**KEY ACHIEVEMENTS & AWARDS**

- **Identified Critical Defects:** Identified and reported critical defects early in the development cycle, leading to their timely resolution and preventing potential issues from reaching production, thereby ensuring product stability and customer satisfaction.
- **Provided Mentorship and Training:** Mentored junior QA team members on testing best practices, tools, and techniques, facilitating their professional growth and contributing to the overall skill development of the team.
- **Received Customer Appreciation:** Received positive feedback from clients for thorough and meticulous testing efforts, contributing to increased client satisfaction and strengthening client relationships.

**EDUCATION**

Aggregate percentage %, Bachelor of Engineering, Computer - **BECS**, Pune University [2018-2021]

Aggregate percentage %, Diploma, Computer Technology, MSBTE [2016-2018]
